

GMA GARNET GROUP

**NIGP is the
Authorized
Distributor of
GMA Garnet
in Qatar**

For over 40 years, GMA has produced the highest-quality almandine garnet abrasives for the global abrasive blasting and waterjet cutting industries globally.

GMA Garnet originated in Western Australia where our primary source of garnet was discovered near the coastal town of Port Gregory. There resides the world's largest and most concentrated alluvial garnet resource.

GMA is the only global garnet producer to manage its complete supply chain, from mine to customer. This vertical integration ensures we maintain an uninterrupted supply of the highest quality garnet to our customers, anywhere in the world.

Global Pioneers in Garnet Abrasives

Discover the GMA Garnet™ range

Find the right garnet abrasive for your project to maximize performance and minimize risk.

Blast abrasives range

Engineered to perform, GMA's blast abrasives range cut and clean faster, delivering optimal performance for any surface preparation job.
